9425584518 | adityagupta26099@gmail.com | linkedin.com/in/aditya-gupta-117a1b264 | github.com/aditya071122

EDUCATION

Rungta College of Engineering and Technology, Chhattisgarh, India

Sep 2022 – Jun 2026

Bachelor of Technology, Computer Science and Engineering(Cybersecurity) Cumulative GPA: 8.0/10.0

Mar Baselios Vidya Bhavan HSS, Chhattisgarh, India

Jul 2020 – Jun 2022

Intermediate (PCM with Computer Science)

EXPERIENCE

Globussoft Technology - Software Tester

Jun 2025 – May 2026

- Executed manual, functional, and regression testing by designing and implementing over **10,000+ test cases** derived from business requirements, user stories, and acceptance criteria.
- Identified, documented, and tracked defects using a Workforce Management Tool, collaborating closely with development and QA teams to achieve a **90% reduction in critical bugs** before production releases.
- Performed end-to-end validation of the **EmpMonitor** application through comprehensive manual testing, defect reporting, and retesting, contributing to a **90% improvement in performance accuracy and system reliability**.
- Collaborated with and supported **500+ clients**, executing test cycles, validating requirements, resolving reported defects, and ensuring successful software working.

TECHNICAL SKILLS AND CERTIFICATIONS

Languages: Python, Java, SQL

Achievements : Leetcode(400+ Problems solved-leetcode.com/u/Aditya0711) ,Earned 10+ technical certifications

Testing: Manual Testing, Functional Testing, Regression Testing, API Testing, SDLC, STLC, Defect Life Cycle

Frameworks/Libraries: Django, Django REST Framework, Flask, Tkinter,NumPy, Pandas, Matplotlib, OpenCV

Databases: MySQL, PostgreSQL, MongoDB

Cybersecurity Tools: Wireshark, OWASP ZAP, Nmap, Metasploit

Certifications: Fortinet Certified Associate – Cybersecurity, Tata Cybersecurity Analyst Job Simulation, Ethical Hacking (Intermediate), Advanced DSA with Java, DBMS – Scaler, HackerRank (Python, Java, SQL)

PROJECTS EXPERIENCE

Face Recognition Attendance System — Python, OpenCV, Tkinter, MySQL

GitHub

- Engineered an automated attendance system leveraging facial recognition and real-time tracking, reducing manual **entry by 15 hours weekly**.
- Engineered OpenCV pipeline and LBPH model linked to MySQL, processing 15,000 facial scans monthly, cutting attendance verification time **from 5 minutes to 45 seconds**.

Jarvis AI Voice Assistant — Python, Hugging Face API, SQLite

GitHub

- Fabricated an AI-powered voice assistant, enhancing speech recognition capabilities and enabling the automation of **over 15 user-driven tasks**.
- Implemented Hugging Face transformers alongside real-time wake-word listener, enabling hands-free application automation that **processed 150 commands per session** without user intervention.

Web Vulnerability Scanner — Python, Tkinter, OWASP ZAP

GitHub

- Developed a GUI-based web vulnerability scanner that automated security assessments across **100+ web pages**, reducing manual testing **effort by 60%**.
- Integrated OWASP ZAP Spider and Active Scan modules to automatically identify **SQL Injection, XSS, and security misconfigurations**, improving vulnerability detection coverage by **80%**.

GiftsandLove E-Commerce Platform — Django, DRF, PostgreSQL

GitHub

- Forged a high-performance full-stack e-commerce platform, incorporating a product catalog, search, and order management, reducing order **processing time by 70**
- Architected robust REST APIs and integrated sophisticated email notifications to streamline order processing workflows, enhancing **system efficiency by 25**
